PREPPING AND CUTTING

1. Assemble and cut pattern pieces following the pattern template and cutting instructions.
2. Fuse the required interfacing to the wrong sides of both exterior and lining panels according to the thickness of your chosen fabrics.
3. Decovil Light/ Foam/ fleece interfacing (if needed) should be cut on the dashed lines and should be centered on the wrong side of the required fabrics before fusing.
4. **Metric measurements are in bold**

Cut out pieces
