8" Sami Girl Doll (Classic Sami Doll Pattern)

Thank you for purchasing this pattern. I hope you will enjoy making one or many sweet dolls with it.

Before printing the pattern:

Make sure your settings are set to "Print Actual Size". The control square will help you double check.

Materials needed:

- ⊗ *Doll Skin*, about 20 cm x the entire width of fabric (I used De Witte Engel doll fabric, if you use Laib Yala or any other doll fabric that has a different 'stretchiness', the doll might come out with different proportions, therefore the doll clothes pattern pieces might have to be adjusted. It might just be a matter of adding to or taking away from the seam allowance)
- ⊗ *Matching sewing thread* (Gütermann, Mettler, Rasant or Nylbond work best)
- ⊗ *Tube* or Stockinette for making the head, (2.5 cm (1") wide/ 45 cm long)
- ⊗ *Strong cotton thread* for tying the head, I use mercerised cotton or crochet cotton yarn
- ⊗ *Doll Hair* (I prefer cotton, bamboo or acrylic yarns, about 50 to 100 g, depending on the yarn weight and hair length)
- ⊗ Depending on the yarn thickness for the hair, *I use crochet hooks from 2.5 to 4.0 to make the wig*
- ⊗ *A 3.0 mm crochet hook (for the shoes)*
- ⊗ *Yarn for the doll shoes* (8 ply)
- ⊗ *A long doll maker's needle and a small one for stitching*
- ⊗ *A stuffing stick* or bamboo chopstick
- ⊗ *An air erasable pen* to trace your pattern and mark the position of the eyes
- ⊗ *Embroidery thread* for the eyes and mouth
- ⊗ *Fabric* for the clothes (Depending on the doll size, you can use fabric scraps or will need larger pieces)
- ⊗ *I prefer Corn or Soy fibre* for stuffing (about 300 g)
- ⊗ *A wool needle*

Let's get started!

Part 1: Making the head

You will need stuffing material, tubing/stockinette, string and a pair of scissors.

The complete circumference of the head will be around \approx 7"/ 17.8 cm for 8" dolls,

Take your tubing and tie a string in the middle.

Start by forming a ball with your corn fibre. I try and squeeze it really tight so I have a firm ball/ egg shape.

Insert the ball into one side of the tube, add some extra fibre for the neck...

... and tie a knot. The other end of the tubing will be pulled over the head once we are done sewing down the eye, neck and chin thread.
