

## ***Specific material for the mouse:***

30 cm x 35 cm faux leather for the head and the ears: if you do not use faux-leather then choose a fabric that doesn't fray.

N.B: If you are a beginner, you can make the ears out of fabric. You will then use the optional ear pattern named « fabric ears style » that you can find on the pattern. You will need 20 cm x 10 cm fabric for the ears.

10 cm x 15 cm faux leather or felt for the muzzle, the tongue and inner part of the ears

36 cm flat faux leather cord for the whiskers (3-5 mm width)

About 10-12 cm ribbon for the ear's bow

1 faux leather scrap for the ear's bow or a piece of ribbon (about 1 cm width x 5 cm long, to adjust)

## ***Specific material for the pig:***

20 cm x 10 cm faux leather or felt for the snout, legs, ears

About 20 cm stainless steel wire

1 set of snap on buttons for the nostrils

## ***Tips:***

- ***Make sure you to fully read each step before starting; it may prevent you from missing out on important information and having to unstitch .***
- ***Always backstitch at the beginning and the end of the seam.***
- ***To prevent the machine from puckering fabric, try to loosen the tension.***
- ***Trace the template pattern on the wrong side of your faux leather fabric.***
- ***These are real size templates (in CM), seam allowances have already been added.***
- ***Copy and trace the pattern of the desired pencil case on pattern paper or clear plastic sheeting. You only need to trace the specified parts (eg. pig's snout, 1x faux leather). The other templates are the pattern placement guide.***

**WOLF PENCIL CASE: pages 1,2,4,5**

**MOUSE PENCIL CASE: pages 1,2,3,4,5**

**PIG PENCIL CASE: pages 2 (for the eyes), 4, 5**

***Sewing instructions: follow instructions for the desired pencil case, then finish by the instructions in common for the three designs described under « Pencil case Assembly »***

### **Step by step Randolph the Wolf**

**Sewing the mouth: step 3 or 4 to 7 at your choice.**

1. Sew around the eyes (zigzag stitch or straight stitch) using the pattern placement guide. Sewing curves can be difficult for beginners. For easier stitching, you may wish to replace round eyes by triangle shaped ones.

You can also choose to use snap buttons instead of sewing faux leather eyes. In that case start the tutorial by step 2, you will attach the snaps at step 8.

2. Stitch the muzzle using the pattern placement guide.

3. If you are a beginner, pin to place a long faux leather rectangle of teeth. Then go to step 8.
