- > The dimensions given in the table refer to the finished dimensions of the shirt.
- > If you want to have an oversized T-Shirt, please choose the larger size.

PATTERN PRINTING LAYOUTS

- > The pattern consists of 15 individual A4 pages for sizes S, M, L and 17 pages for size XL.
- > Open the pattern with Adobe Acrobat Reader. Click on File → Print and print the first page with the setting "actual size". Make sure that the paper is correctly fed in the printer (setting A4).
- > If the size of the **control square is correct**, you can print the remaining 15 or 17 pages with the same setting.
- > Then glue the individual sheets together as shown in the illustration.

FABRIC CUTTING

- > Pattern pieces: Front and back parts, each in fabric fold, two sleeves and a cuff for the neckline.
- > The seam allowances are included in the pattern and are 2 cm at the hem, 1.5 cm at the sleeve hem and 0.7 cm at the side seams, shoulder and neckline.
- Align the grain parallel to the fabric fold or edge.
- > Irone the cuff lengthwise in the middle for further processing.
- Make sure to transfer the little marks on the pattern to your fabric pieces to help match the pieces later.
