## Base of the bag and fixing the bottom of the nylon straps

To give a square base to the bag, you will remove at the bottom of the leatherette and at the bottom of the lining a square of 5 x 5 cm fabric.

We do not sew anything for now, we must first fix the «ears» of the bag and it is a delicate operation. Look at the pictures for the direction of the straps.

We will position the piece in leatherette 3 cm above the square that has just cut.
