5 Join the long edge of the triangle made in step 1, to the long edge of a piece B1 (green) triangle to make a square. Press the seam allowances towards the larger triangle.

Repeat this process with the triangle made in step 2, to make a second square.

6 Join the short side of piece B2 (red) on either side of one of the squares that you made in step 5. Repeat the process with the second square made in step 5. Both pieces should look like the ones in the photo, with the seam across the centre square running diagonally from the bottom left to the top right.

7 Stitch the long side of an A3 (white) triangle to the long side of the small red triangle (A2) in the shape made in step 6.

8 Join the long edge of the triangle made in step 3 to the long edge of a B1 (green) triangle to make a square. Press the seam allowances towards the larger triangle.

Repeat this process with the triangle made in step 4, to make a second square.

9 Stitch the two squares made in steps 8 to opposite sides of square C (light green). Press the seam, then press the seam allowances inwards towards the central square. The two slanting seams across the squares at either end should run parallel to each other. This is important for the shape of the block.
