- SCISSORS/ROTARY CUTTER (OPTIONAL)
- PINS/CLIPS (OPTIONAL)
- RULER
- SEWING MACHINE
- BAG TWIST TIES, CRAFT PIPE CLEANERS (if using craft pipe cleaners, cut to 4 inch)
- IRON
- UPCYCLED T SHIRT/ OR KNIT FABRIC (for the mask ties)

Instructions

1 Cutting Out Mask

Cut fabric on the fold using the pattern guide for the size you want. Rectangle measurements when unfolded.

ADULT: Fabric 14 1/2 inches x 8 inches (36.8 cm x 20.3 cm).

TEEN: Fabric 13 3/4 inches x 7 inches

CHILD: Fabric 13 inches x 6 inches

2 Cutting Out Ties

The beauty of knit fabric, is that it doesn't fray and when pulled it will curl. You may be asking why do we want it to curl? When it curls it creates a little tube, like an enclosed tie, but you don't have to sew it to keep it that way like you would a woven fabric.

Cut two strips either crosswise or lengthwise 1 inch wide. (2.5) cm

Cutting along the bottom of a t shirt, the fabric will curl and expose the wrong side of fabric.

(Which doesn't matter if using a plain color, preference only).

But if you want the right side of the fabric exposed, cut the shirt lengthwise as shown in the diagram above.
