

14 Once you have completed one of the quarters, set it aside and go on to another one, for example, the red one. It doesn't matter which order you make the quarters in, just check that you have the dark to light progression correct for the particular quarter of the quilt.

15 Join the squares into rows and then join the rows as explained in steps 6-11.

Step 11 is pictured right.

17 When all four quarters of the quilt have been completed, join the red to the blue quarter and the green to the yellow quarter.

Next join the top half to the bottom row. The quilt top is completed.
