

2 Making the handles :

Divide the 6 cm length coupon in two so that you have two 6 x 68 cm strips (This measurement is random. Depending on your size, you may want the handles maybe slightly shorter or longer...)

Make a tuck-in with an iron of a centimeter on each side of the two bands

Then fold the strip in half. Iron again strongly, aligning the sides.

Sew a rib seam, that is to say as much at the edge as possible (about 1mm from the edge, or 2mm if you find that this is not enough depending on your presser foot etc ...)

You can choose to sew a second seam on the other side of the handles.

We leave the handles aside for the moment.
