

Insert the needle 2-3 mm lower, along the fold of the slit, and come out at the top of the slit. Form a loop of sufficient size to pass your button through. (73)

Insert the needle through the loop and then under the thread. (74)

This will form a knot. (75)

Pull on it to tighten it at the base of the loop. (76)

Continue to tie knots around the loop to completely cover it. (77)

Insert the needle at the base of the loop, between the two layers of fabric, pull and tie before cutting the thread. (78)
