

Sewing instructions

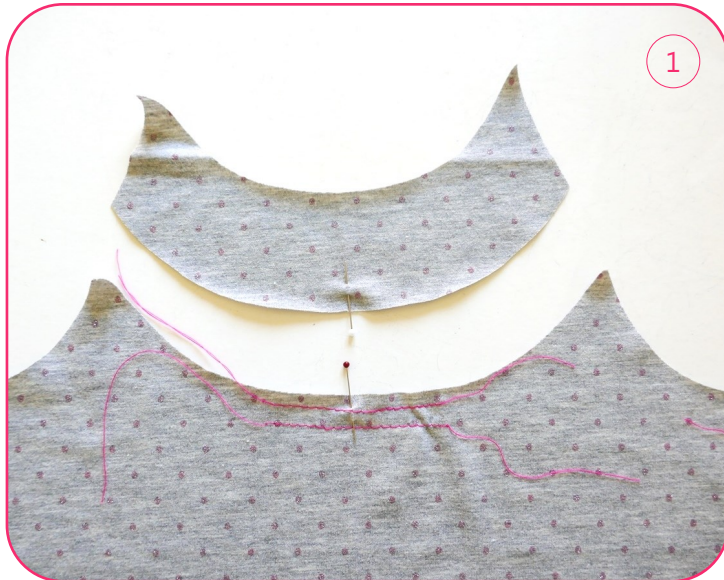

- 1 - Assembling the yoke and the front

Two methods are proposed to make the gathers: the classic one with gathering threads, and the second using a transparent elastic (for ex. Framilastic by Vlieseline®).

First method, with gathering threads:

On the front, stitch two lines of gathering threads, between the pattern's marks, 0.5 and 1.5 cm from the edge. Place two marker pins in the middle of the curve of the front and the yoke. (1)

Right sides together, pin the yoke and the front from the armholes, to the beginning of the gathers. Match the two marker pins. Place the pins on the front side to make it easier. (2)

When pinning the armholes, make sure the ends of the stitching lines match each other.
