

2:

Determine which side you put your zipper on.

For the tutorial, I decide to put it on the left side of the skirt. On the photos it is reversed because we see the pieces on the back.

Pin the right side of the back to the right side of the front right side together.

Also pin the right side of the unlined front waistband with the right side of the unlined back waistband.

Instead, pin the left side of the canvas front waistband with the left side of the canvas back waistband.

Stitch 1 cm from the edge and press the seams apart.

3:

Pin right sides together the bottom of the non-lined waistband at the top of the skirt set (front and back) by adjusting the markings (seams, notches in the middle of the piece).

Stitch at 1 cm then lay the assembly up.

4:

Pin right sides together the top of the canvas belt to the top of the non-canvas belt, adjusting the notches.

Stitch 1 cm from the edge but we are not going to stitch the entire length... you start at 2.5 cm from the edge and you stop at 2.5 cm from the edge.

Spread the iron seam.

Notch, strip the skirt + belt assembly and the assembly of the belt tops.
